

A set of Tekla Structures courses

Brand: Dmytro Kirman
Product Code: SET-TKLSTR-0001

Price: ~~\$ 825.00~~ \$ 660.00

Short Description

This kit will allow you to master the Tekla Structures software package from scratch and learn how to model the key elements of steel and reinforced concrete structures.

Description

A set of three courses in structural engineering at Tekla Structures

The set includes the following video courses:

- [Tekla Structures. Вводный курс для начинающих](#)
- [Курс проектирования железобетонных конструкций в среде BIM Tekla Structures](#)
- [Курс проектирования стальных конструкций в среде BIM Tekla Structures](#)
- [Курс спецификаций в Tekla Structures](#)

+ bonuses

Tekla Structures 2017 working models for testing modeling skills (used environment Russia):

- [Reinforced concrete model in Tekla Structures](#)
- [Steel structure model in Tekla Structures](#)

This kit will allow you to master the Tekla Structures software package from scratch and learn how to model the key elements of steel and reinforced concrete structures.

You will learn the basics of three-dimensional modeling, the development of structural designs of buildings, modeling columns, beams, trusses, units, foundations, etc. Also learn how to create drawings, issue specifications, and detail.

This series of courses is recommended:

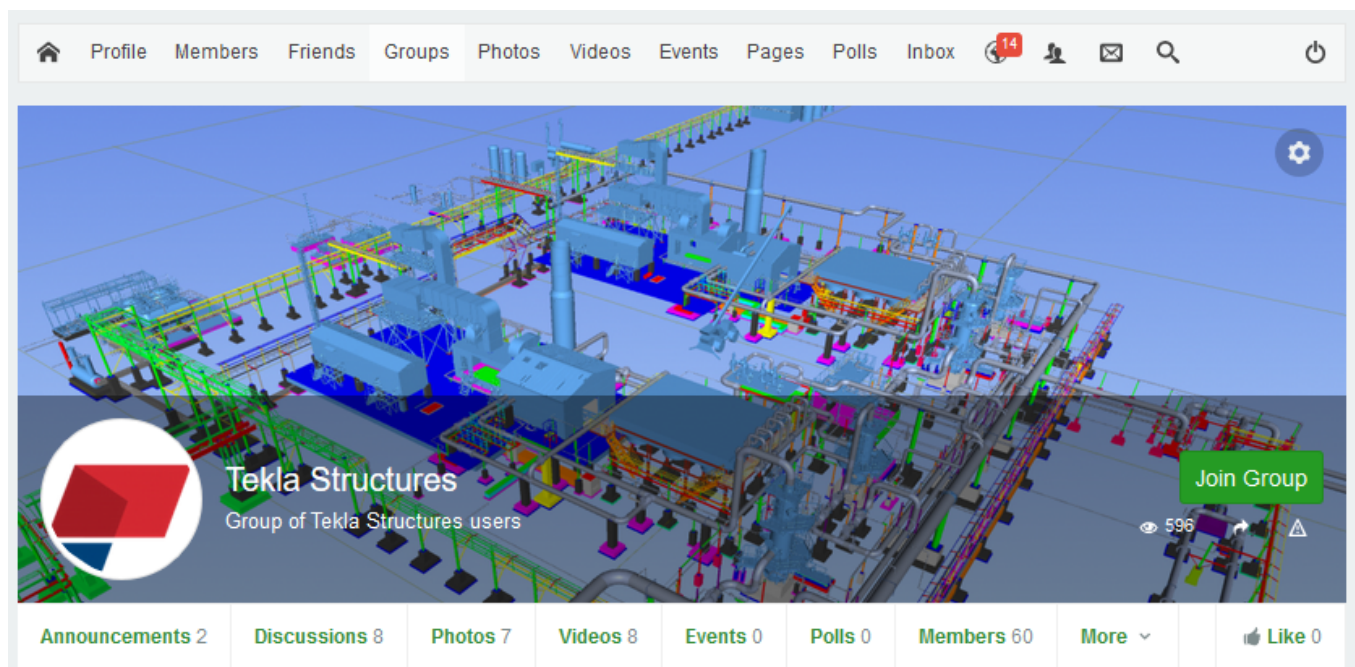

- structural engineers of buildings and structures
- civil engineering students
- anyone who wants to master the design of buildings and structures using BIM technology

Courses consist of a series of video tutorials that will be available after purchasing the kit.

You can also count on the support of the course author and ask him questions in his group on forum.

Training and support

{module 273}

Specification

General properties	
Material	steel

Material	reinforced concrete
Product language	russian
Scope, knowledge system	
Scope of application	Civil Engineering
Software and product files	
Software	Tekla Structures 2017
Software	Tekla Structures 2019i
Video course	
Video hosting	YouTube
